

Environmental Policy Statement

Premier Waste Management is committed to continually reducing the environmental impact of the business. This is achieved through implementation of the requirements ISO14001:2015 Environmental Management System, as part of their Integrated Management System (IMS), Premier Waste. The requirements of the IMS include systems and processes to:

- Sourcing operational equipment and goods that minimise their operational environmental impacts
- Recycling operational waste materials and, as required, refurbishing operational equipment to minimise landfill
- Identifying operational aspects and controls to eliminate or minimise environmental impacts
- Establishing and monitoring environmental objectives and targets that are relevant to the operational performance of the business with the focus on improving operational efficiency
- Complying with all applicable national, state and local environmental laws, regulations and standards and, as required, planning and implementing changes to operations as part of their management review process
- Regularly reviewing operational activities to monitor environmental performance and ensure environmental objectives are achieved
- Reviewing and updating relevant IMS environmental documentation based on changes to legal requirements, business operations and processes
- Ensuring that external interested parties are aware of the business' environmental focus and as required, reporting business performance against environmental objectives
- Implementing actions on identified compliance to the requirements of the Environmental IMS or feedback from external interested parties and, as required, implement corrective actions to eliminate similar issues. This is monitored through the Management Review process
- Ensuring through training activities that employees and contractors are aware of the IMS environmental requirements and control measures to minimise identified operational aspects

To maintain awareness of Premier Waste Management's environmental management, this statement is posted in prominent positions on sites controlled by Premier Waste Management and distributed to contractors and stakeholders.
